PROFESSIONAL SUMMARY

Automation & Integration Specialist with 2 years of hands-on experience building secure n8n workflows, AI automations, and systems integrations. Designed a seven-workflow multilingual receptionist and booking system using Gemini, PostgreSQL, Google Calendar, Next.js, and Docker.

PROJECT EXPERIENCE

SELF-DIRECTED AUTOMATION & INTEGRATION PROJECTS (Portfolio Projects)

Philippines
2024 - Present

Automation & Integration Specialist

- Build n8n and API integration systems across AI, ERP, CRM, PostgreSQL, and messaging platforms.
- Apply validation, idempotency, duplicate prevention, approval gates, audit logging, and centralized error handling to keep workflows reliable and reviewable.
- Use JavaScript, Node.js, Next.js, Docker, Postman, and PowerShell to develop, test, deploy, and troubleshoot automation solutions.

SELECTED PROJECTS

RANA - MULTILINGUAL AI RECEPTIONIST (Portfolio Project)

2026

- Designed seven workflows for multilingual inquiries, recommendations, booking, rescheduling, and cancellation, with live availability and Google Calendar conflict checks.
- Secured the system with HMAC-signed requests, rate and budget limits, duplicate detection, approved-knowledge RAG, private database networking, audit logs, and human escalation. Tech: n8n, Gemini, PostgreSQL, Google Calendar, Next.js, Docker.

INVENTORY REPLENISHMENT & DRAFT RFQ (Self-Directed)

n8n / Odoo

- Compared Odoo stock with minimum levels, recorded replenishment requests in PostgreSQL, and created draft RFQs only after supplier checks and one-time approval.
- Prevented duplicates, logged each stage, sent Gmail notifications, and routed failures to a separate database-and-email error workflow. Tech: PostgreSQL, Gmail, Docker.

AI LEAD TRIAGE & HUMAN REVIEW (Self-Directed)

n8n / Gemini

- Validated fictional inbound leads and used Gemini to return structured summaries, priorities, buying signals, and reply drafts.
- Routed results to a salesperson for review, keeping a person responsible for follow-up. Tech: n8n, Gmail, structured JSON.

CRM & DATA OPERATIONS (Self-Directed)

Zoho / Airtable

- Validated and deduplicated sample Zoho CRM leads before downstream record creation; routed quote decisions through controlled approval links and stored outcomes in PostgreSQL.
- Standardized Airtable contacts, archived old logs on schedule, and flagged data inconsistencies for review. Tech: n8n, Discord.

TECHNICAL SKILLS

Automation & APIs: n8n, Webhooks, REST APIs, Scheduled Workflows, Postman, SMTP / Gmail

AI Automation: Google Gemini API, RAG, Structured JSON Output, Multilingual Conversation Design, Human-in-the-Loop Review

ERP, CRM & Data: Odoo Community, Zoho CRM, HubSpot, Airtable, PostgreSQL, Supabase, SQL

Development & Operations: JavaScript, Node.js, Next.js, Git, Docker, PowerShell, API Authentication, HMAC

EDUCATION

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES - SANTA MESA

2016 - 2017

Bachelor of Science in Information Technology coursework
